

WEERAPAT BUACHUEN

SENIOR SOFTWARE ENGINEER | FULL-STACK, BACKEND & SYSTEM DESIGN

weerapat.buachuen@gmail.com | [LinkedIn Profile](#) | +66 94 521 8645 | Bangkok, Thailand |

English: Professional working proficiency

PROFESSIONAL SUMMARY

Senior Software Engineer with 7+ years of experience designing and delivering scalable, cloud-based software systems. Strong expertise across backend and frontend domains, enabling full ownership of complex features from architectural design through production deployment.

Experienced in system design, data modeling, and improving system reliability through modular architecture and engineering best practices. Proven ability to lead technical initiatives, influence architectural decisions, and collaborate cross-functionally to deliver high-impact solutions aligned with business objectives.

Comfortable operating in fast-paced environments where performance, maintainability, and long-term scalability are critical.

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, Python, PHP

Backend & API Development: Node.js (Express), Django, Flask, Laravel, RESTful APIs, GraphQL

Frontend Development: Vue.js, React.js, Angular

Cloud & Infrastructure: AWS, Google Cloud Platform (GCP), Docker, VPS, Linux (Ubuntu)

Databases: MySQL, PostgreSQL, MongoDB, DynamoDB, Firestore

Architecture & Engineering Practices: Software Architecture, System Design, Requirements Analysis, Code Review, Technical Documentation, Project Leadership

AI-Augmented Development: Claude, Cursor, GitHub Copilot, ChatGPT, Gemini, OpenAI APIs

PROFESSIONAL EXPERIENCE

GoUpscale Technology

Senior Software Engineer | Sep 2023 – Feb 2026

- Contribute to architectural design and technical decision-making within owned backend product features.
- Design scalable data models and optimize database structures to support growing system complexity.
- Improve system reliability and maintainability by restructuring core modules and standardizing architectural patterns.
- Own end-to-end feature delivery, from requirement analysis and system design to deployment and production support.
- Conduct peer code reviews and help elevate engineering standards and development practices.
- Contribute to AI-powered product initiatives by designing backend services, data flows, and supporting infrastructure for integrating intelligent features into production systems.

NPD S Group Co., Ltd.

Software Engineer / Project Manager | Apr 2021 – Jul 2023

- Led company-wide digital transformation initiatives, implementing internal software solutions across multiple departments.
- Managed end-to-end ERP system development projects, coordinating stakeholders, timelines, and technical execution.
- Architected and maintained core web services and cloud infrastructure to ensure system scalability and stability.
- Developed internal platforms, including time attendance (PWA) and business data visualization systems.
- Established technical documentation and process guidelines to support operational continuity.

Bangsue Industrial (SCG Group)

Full Stack Developer | Jul 2019 – Mar 2021

(Initially contracted via Getlinks; transitioned to direct hire)

- Designed and developed online ordering and CRM/CMS platforms serving administrators and customers.
- Built e-commerce systems integrated with payment gateways, SMS providers, shipping APIs, and social platforms.
- Designed database schemas and managed AWS-based cloud deployment.

Anunda Technology Co., Ltd.

Full Stack Developer | Jul 2018 – Jun 2019

- Developed internal business applications to support organizational workflows.
- Translated user requirements into scalable web-based solutions.

EDUCATION

Master of Software Engineering

Chulalongkorn University | 2021 – 2023

Thesis: Automated Stock Trading System Using Deep Learning

- Developed predictive models for stock price forecasting.
- Built automated trade execution via brokerage API integration.
- Designed cloud-based data processing and storage pipeline.

Bachelor of Engineering in Telecommunication Engineering

King Mongkut's Institute of Technology Ladkrabang | 2015 – 2019

HONORS & AWARDS

SET (The Stock Exchange of Thailand) Research Scholarship — 2023

Awarded for research on automated stock trading systems using deep learning models.
