Bangkok, Thailand | English: Professional working proficiency

PROFESSIONAL PROFILE

Senior Full-Stack Software Engineer with 7+ years of experience designing, developing, and maintaining scalable software systems. Strong background across backend and frontend domains, enabling end-to-end ownership of complex features from system design to production deployment.

Experienced in architectural decision-making, data modeling, and improving system reliability through modular design and standardization. Proven ability to lead technical initiatives, influence engineering best practices, and collaborate effectively with cross-functional teams to deliver high-impact solutions aligned with business objectives.

TECHNICAL COMPETENCIES

- ✓ Programming languages
 - JavaScript, TypeScript, Python, PHP
- ✓ Frontend Development
 - Vue.js, React.js, Angular
- ✓ Cloud & Infrastructure
 - AWS, Google Cloud Platform (GCP), Docker, VPS, Linux (Ubuntu)
- ✓ Architecture & Engineering Practices
 - Software Architecture, System Design, Requirements Analysis
 - Technical Documentation, Code Review, Project Leadership
- ✓ Backend & API Development
 - Node.js (Express), Django, Flask, Laravel
 - RESTful APIs, GraphQL
- ✓ Databases
 - MySQL, PostgreSQL, MongoDB, DynamoDB, Firestore
- ✓ AI-Augmented Development
 - Claude, Cursor, GitHub Copilot, ChatGPT, Gemini, OpenAI APIs
- ✓ Additional Expertise
 - UX/UI Design

PROFESSIONAL EXPERIENCE

GoUpscale Technology

Senior Software Engineer | Sep 2023 – Feb 2026

- Contribute to architectural design and technical decision-making within owned backend product features.
- Design scalable data models and optimize database structures to support growing system complexity.
- Improve system reliability and maintainability by restructuring core modules and standardizing architectural patterns.
- Own end-to-end feature delivery, from requirement analysis and system design to deployment and production support.
- Conduct peer code reviews and help elevate engineering standards and development practices.
- Contribute to AI-powered product initiatives by designing backend services, data flows, and production-ready system support.

NPD S Group.Co., Ltd.

Software Engineer, Project Manager | Apr, 2021 - July 2023

- Led company-wide digital transformation initiatives, implementing internal software solutions across multiple departments.
- Managed ERP system development projects, overseeing requirements gathering, planning, and cross-functional coordination.
- Architected and maintained core web services and cloud infrastructure to ensure system stability and scalability.
- Developed internal platforms including time attendance (PWA) and business data visualization tools.
- Established technical documentation and process guidelines to support long-term operational continuity.

Bangsue Industrial (SCG Group) - (Initially contracted via Getlinks; transitioned to direct hire)

Full Stack Developer | Jul, 2019 - Mar, 2021

- Designed and developed online ordering and CRM/CMS platforms serving administrators and customers.
- Built and maintained e-commerce systems integrated with payment gateways, SMS providers, and shipping APIs.
- Designed database schemas and managed AWS-based cloud deployment.
- Implemented third-party integrations including social platforms (Facebook, LINE).

Anunda Technology.Co., Ltd.

Full Stack Developer | Jul, 2018 - Jun, 2019

- Developed internal business applications to support operational workflows across multiple departments.
- Analyzed user requirements and translated them into functional, scalable web solutions.

EDUCATION

2021 - 2023 | Chulalongkorn University

Master of Software Engineering

Thesis: Automated Stock Trading System Using Deep Learning

- Developed predictive models for stock price forecasting using deep learning techniques.
- Built automated trade execution via brokerage API integration.
- Designed cloud-based data processing and storage pipeline.

2015 - 2019 | King Mongkut's Institute of Technology Ladkrabang

Bachelor of Telecommunication Engineering

HONORS & AWARDS

SET (The Stock Exchange of Thailand) Research Scholarship – 2023

Awarded for research on automated stock trading systems using deep learning models.

INTERESTS

Open-source contributions • System design exploration • Technical writing
Building side projects • Football • Music (Guitar)
